

North East Valley Healthcare Corporation San Fernando Wellness Center

San Fernando, CA

This outpatient clinic is an addition that will expand community access to basic healthcare services. The project is a new 2-story, 10,000 square foot clinic offering primary care and OB/GYN services. The facility features a conference room, offices, 11 exam rooms, a Women's Health Suite with two private exam rooms, and parking for 115 cars. This project was partially federally funded through the Affordable Care Act. The design is based on the historic adobe style architecture of the San Fernando area.
